

Supplementary table w  
Correlation between quantitative items and simplified items

	Grip Power	Pinch Power	%FVC	CK	DEXA LEGs	MMT Elbow Flex	MMT Knee Ext
summed MMT	0.795**	0.689**	0.720**	0.742**	0.542*	0.942***	0.760**
GMFM	0.738**	0.629**	0.693**	0.572*	0.452*	0.886***	0.636**
6MWT	0.839***	0.800***	0.140	0.084	0.139	0.358	0.134
DEXA Legs	0.610**	0.633**	0.437*	0.495*	-	0.567*	0.466*

\*\*\* very strong correlation  $\rho \geq 0.8$   
\*\*strong correlation  $0.6 \leq \rho < 0.8$   
\*: moderate correlation  $0.4 \leq \rho < 0.6$

Quantitative items such as Summed MMT and GMFM were well correlated with pinch power, grip power, %VC or %FVC, CK, and DEXA (legs). These items were also correlated with certain muscle MMT scores (e.g., elbow flexion and knee extension).
